1. Overview

SolarBazaar ek digital platform hai jahan users solar system ka estimate nikal sakte hain aur verified vendors se connect ho sakte hain.

Is new feature ka maqsad hai:

Vendors ko apna solar stock list karne ka platform dena
Users ko real-time market-based solar estimate provide karna
Estimate ko static na rakh kar dynamic aur vendor-driven banana
2. Objectives
Primary Goals:
Vendor-based solar store marketplace create karna
Real-time price-based estimation system build karna
Platform ko lead generation se ecommerce + SaaS model me convert karna
Secondary Goals:
Vendor visibility increase karna
Accurate cost estimation provide karna
User trust improve karna
3. System Modules
3.1 Vendor Store Module

Har vendor jo SolarBazaar ka subscription lega usay apna store milega.

Features:
Vendor profile (name, location, contact info)
Product listing system:
Solar panels
Inverters
Batteries
Accessories
Price add/edit/delete option
Stock availability status
Product images upload
3.2 Product Listing Structure

Har product ke liye fields:

Product Name
Category (Panel / Inverter / Battery / etc.)
Brand
Specifications (watts, capacity, etc.)
Price
Stock status
Vendor ID
3.3 Marketplace (Frontend Store)

User ke liye ek centralized store:

Features:
All vendors ke products show honge
Filters:
Price range
Brand
Category
Compare products option

Vendor-wise listing
3.4 Smart Solar Estimation Engine

Ye system ka core feature hoga.

Working Logic:
User apni requirement enter kare:
Monthly units
Location
System type
System required components calculate kare:
Panels required
Inverter size
Battery requirement
System marketplace se data fetch kare:
Lowest price ya average price select kare
Ya preferred vendor ka data use kare
Final estimate generate kare:
Total cost breakdown
Component-wise pricing
Installation estimate
4. Estimation Calculation Flow

Step-by-step flow:

User input
Load calculation formula
Required components determine
Vendor listings fetch
Price mapping apply
Final estimate generate
5. Pricing Strategy Logic

System multiple strategies support kare:

Lowest price selection
Average market price
Vendor-specific estimate
Premium vendors priority
6. Vendor Subscription Model
Plans:
Basic Vendor (limited listings)
Premium Vendor (unlimited listings + featured placement)
Benefits:
Store access
Product listing
Leads generation
Visibility in estimates
7. Admin Panel

Admin controls:

Vendor approval
Product moderation
Pricing validation
Featured vendors control

Commission settings
8. Revenue Model

Platform earn karega:

Vendor subscription fees
Featured listing charges
Commission per sale (future phase)
9. Future Enhancements
Direct checkout system
Installation service booking
AI-based smart recommendations
Location-based vendor matching
Live price updates
